

Delta Argut

Universal Data Storage Module

The Delta Argut Hybrid storage module is designed both to expand the disk space of available servers and to be used as part of software-defined data storage systems offering flexible options for hot or cold storage. The Delta Argut Hybrid storage module from Delta Computers is designed and manufactured in Russia.

Storage	30 slots 2.5" U.2 (7-15mm) NVMe SSD
Interface	PCIe 3.0 x16
LAN	1x 1GbE LAN
Zoning	Up to four hosts
Firmware	Delta BMC
Power	From 12V OCP centralized bus bar
Supported OS	Supported by client server
